Commenting on the performance, GPT Chairman, Mr. Dwarika Prasad Tantia, said,

“The Company has witnessed one of its strongest performance for the first half ending September 30, 2022 and it gives the management confidence of achieving the target set for the year. What I am most optimistic is that we have been able to preserve our cash flows, with Cash Flow to EBITDA conversion of approx 80%, a target which we had set ourselves a couple of years back and we have been able to achieve in the last 6 quarters. This has also led to improvement in both ROE and ROCE. During the H1 FY23 the total order inflow stood at **Rs 516 crore**, including incremental orders from existing contracts with the total **order book of Rs 1,862 crores as of September 2022**, creating an order visibility of 2.76 Years. The focus of the Government has been to create world class infrastructure for the country and we at GPT believe that we can take part in this journey of changing the landscape for the country despite challenging global economic conditions as witnessed by currency depreciation and interest rate hardening. We continue to maintain the momentum to close the year with one of the strongest revenues and profits with quite healthy cash flows, leading to good shareholder returns. In this line, the Board had recommended a bonus issue of 1:1 and the same has been approved by the Shareholders, which will be allotted with a record date of November 12, 2022.”
